About US

Professional produce cultural and creative gifts

Nuohua Group is a professional company specializing in the research and production of silicone raw materials, mainly providing selicone products R&D development, production, and packaging of silicone products.
We offer a complete range of OEM&ODM services.

Rich Manufacturing Experience

Established in 2004, with 21 years industry experience,it has companies such as: Meizhou Athome Industrial Co., Ltd., Shenzhen Nuohua Silicone Rubber Products Co., Ltd., Shenzhen Nuozhanxin Organic Silicon Materials Co., Ltd., Nuohua Cultural and Creative Park, etc.

Nuohua Cultural and Creative Park

The Nuohua Cultural and Creative Park covers 40 acres area, factory building totally area 26,500 square meters. It has also imported several advanced fully automatic production lines to enchance the production.

Oversea Vietnam Factory

Actively explore overseas factories to accelerate the globalization process.

Domestic Meizhou Factory

- 12,500 square meter solar factory building in Nuohua Creative Park has been completed and combine to the grid.
- In response to the government environmental protection policy to reach energy conservation and emission reduction, it can optimize electricity costs and benefits customers.
- The completion of the Nuohua Logistics Park has significantly enhanced the efficiency of loading and shipping.

Production Workshop

- Professional R&D team and advanced machinery and equipment .
- Strictly control quality and the production of top-notch product quality.

Packing Workshop

Transfer Printing Workshop,
Silkscreen Printing Workshop
Heat Transfer Printing Workshop

PVC Dipping Molding Workshop

Tooling Workshop

Used Recycled & Environmentally Friendly Silicone Materials

- **During the production process of silicone products, a lot of leftover scraps and defective products are generated, which leads to a waste of materials. Through our recycling efforts, we can achieve energy conservation and environmental protection effects.**
- **Safe and reliable. It is exactly the same as the new silicone materials.**

Environmental Protection Material Production Qualification Certificate

Illustration of the production process of environmental-friendly materials-01

Integrate the new silicone material to create a new environmentally friendly materials and put it into production.

Grinding Treatment

Recycle some defective products as scraps and leftovers .

Illustration of the production process of environmental-friendly materials-02

Made as new silicone materials which is enironmental,then put into production.

Extract and break down the components of silicone.

Recycle some defective products as scraps and leftovers.

Grinding Treatment

Nuohua New Technology

- **Constantly innovate technologies to enhance the competitiveness of the enterprise.**

Optical Cement

- Highly transparent and heat-resistant raw materials, transmittance of 96%.
- Suitable for producing high-transparency appearance products, applicable to lamp covers and water appliances.

- High-temperature resistant, flame retardant.
- Used for the fireproof and flame-resistant layers, insulation layers and sheaths of wires and cables.

Ceramic Silicone Rubber

Foamed Rubber

- Applied to pillow and cushion products.

Nuohua Team Building

- Nuohua family has always maintained to provide the best service to the customer, and is constantly enhancing their capabilities.
